EDUCATION

Concordia University

Bachelor of Computer Science (BCompSc)

Sep. 2023 – Dec 2026 (Expected)

Montreal, QC

WORK EXPERIENCE

FlowFit (formerly Consoltec)

Full-Stack Software Developer Intern

Sep. 2025 – May 2026

Montreal, QC

- Built and shipped end-to-end full-stack features, including partial document delivery and enhanced search filters, improving user experience and overall application responsiveness.
- Wrote and maintained comprehensive unit tests, fixed bugs, and partnered with QA and code reviewers to deliver reliable, production-ready releases.
- Integrated computer-assisted translation tools such as Phrase Cloud into the platform, expanding system capabilities and streamlining translation workflows for clients.
- Collaborated closely with team leads and peers to deliver key user stories, earning consistently positive feedback for code quality, communication, and

SYNERGX

Software Developer Intern

Jan. 2025 – May 2025

Laval, QC

- Developed and maintained a Windows 11 image generation pipeline to automate software installation for up to 9 glass inspection machines used in manufacturing environments
- Wrote and optimized Batch and PowerShell scripts to fully automate image creation and deployment, requiring no user prompts and streamlining system setup
- Collaborated with engineering teams to debug, troubleshoot, and resolve technical issues throughout the pipeline development process
- Ensured reliable and consistent deployment of necessary software, supporting high-quality production and equipment readiness

PROJECTS

[FarmConnect](#)

Sep. 2026

- Developed a cross-platform marketplace app using React Native, Expo, and Supabase, connecting customers with local farms to discover and book produce, livestock, and farm activities.
- Engineered a two-sided booking and inventory system with Supabase, including group-split slaughter bookings, shared invitees, inventory management, and seasonal ticketing workflows.
- Won the Open Innovation Challenge at MuslimHacks for building FarmConnect, demonstrating the ability to rapidly design and deliver a full-stack solution to a real-world problem in a hackathon environment.

[Spotify Playlist Sorter](#)

Aug. 2026

- Integrated the Spotify Web API to securely retrieve user playlists and track metadata, implementing authenticated API requests to interact with users' Spotify data.
- Implemented Spotify OAuth authentication and session management with Better Auth, protecting user-specific resources and handling authenticated application flows.
- Designed a responsive, component-based UI with Next.js and HeroUI, creating interactive playlist management and sorting workflows.

TECHNOLOGIES

- **Technologies:** JavaScript/TypeScript; C#/.NET; Java; Python; ASP.NET; React; Next.js; React Native; Angular; Supabase; Firebase; RabbitMQ
