EDUCATION

Concordia University

Bachelor of Computer Science (BCompSc)

Sep. 2023 – Dec 2026 (Expected)

Montreal, QC

WORK EXPERIENCE

FlowFit (formerly Consoltec)

Full-Stack Software Developer Intern

Sep. 2025 – May 2026

Montreal, QC

- Shipped partial-document delivery and richer search filters across production ASP.NET/Angular applications, improving application responsiveness by letting users retrieve results without waiting for a full document.
- Wrote and maintained comprehensive unit tests, fixed bugs, and partnered with QA and code reviewers to deliver reliable production releases, reducing Azure DevOps pipeline test time from 30 minutes to 2 minutes.
- Integrated computer-assisted translation tools such as Phrase Cloud into the platform, evaluating and embedding software directly into the application instead of a separate client workflow.
- Delivered user stories with leads and peers; reviews consistently called out code quality and communication.

SYNERGX

Software Developer Intern

Jan. 2025 – May 2025

Laval, QC

- Developed and maintained a Windows 11 image generation pipeline that automated software installation for up to 9 glass inspection machines in a manufacturing environment.
- Wrote and optimized Batch and PowerShell scripts to fully automate image creation and deployment, eliminating user prompts and streamlining system setup.
- Collaborated with engineering teams to debug, troubleshoot, and resolve technical issues throughout the pipeline development process.
- Ensured reliable and consistent deployment of required software, supporting production quality and equipment readiness.

PROJECTS

[FarmConnect](#)

Sep. 2026

- Won the Open Innovation Challenge at MuslimHacks for building FarmConnect, demonstrating the ability to rapidly design and deliver a full-stack solution to a real-world problem in a hackathon environment.
- Developed a cross-platform marketplace app using React Native, Expo, and Supabase, connecting customers with local farms to discover and book produce, livestock, and farm activities.
- Built a two-sided booking and inventory system in React Native, Expo, and Supabase (shared bookings, invitees, seasonal ticketing system), not just a listing UI.

[AI Incident Triage App](#)

Sep. 2026

- Collaborated with a team of 6 to develop an AI-powered incident triage application within 70 minutes, leveraging the Gemini API and Vercel's AI SDK to streamline incident assessment and prioritization.
- Implemented backend integration with Supabase for authentication and database management, and contributed to the final project presentation.
